

If you wish to contribute to our Air Cadet Gliding Program, the Alberta Provincial Committee considers the following items to be a priority for donation:

1. Our vehicle fleet, ranging in age from 8 to 25 years old requires incremental replacement due to age and increased towing capability requirements. We urgently require two.

40,000+

2. Acquisition of two more gliders. We are struggling in the Edmonton and Calgary areas to provide the necessary airlift due to shortage of aircraft, among other things.

40,000

3. Hangar Door Replacement at our field in Netook, Alberta. The large 60' x 14' main door is in need of replacement.

30,000

4. Assist in replenishing our cash reserves after a denied grant application for a building we recently built to replace and supplement a wartime structure at our field in Netook, Alberta

up to 30000.

5. 40' or 60' office/classroom "skid shacks" for use at three locations where there are no facilities. May be used units, but must meet DND structure mould/asbestos standards for cadet use. Require suitable electrical generation for an electric furnace. Water not required. Transportation and installation at Grande Prairie, Josephburg and Vulcan Alberta also required.
