

If you wish to contribute to our Air Cadet Gliding Program, the Alberta Provincial Committee considers the following items to be a priority for donation:

1. Our vehicle fleet, ranging in age from 10 to 22 years old requires incremental replacement due to age and increased towing capability requirements. We urgently require two. \$40,000+

2. Acquisition of gliders. We would like to add two gliders to our fleet of seven. Currently we operate eight with a borrowed glider from Manitoba or Saskatchewan. \$40,000+

3. 40' or 60' office/classroom "shacks", or retired portable classrooms for use at three locations where there are no facilities. May be used units, but must meet DND structure mould/asbestos standards for cadet use. Require suitable electrical generation for an electric furnace. Water not required. Transportation and installation at Grande Prairie, Josephburg and Vulcan/Kirkcaldy also required. \$????????
